Aims and Scope

The CDD Journal aims to publish peer-reviewed, original research on all aspects and intersections of climate, disaster and development, and their interaction. As policy makers, development workers and the general public become more keenly aware of the rising risks posed by climate hazards and disasters and their impacts on national development, the journal provides a forum for the presentation of recent research findings on these topics and their management implications. It is not only for researchers, but for anyone concerned with national development amidst climate risks and disasters.

Contribute to the Journal

If you think your research falls under any of these five categories: (1) advances in climate science; (2) climate change and ecosystems; (3) climate-response sectors; (4) vulnerability and risk assessment and management; and (5) capacity building and development, we encourage you to submit a paper. Visit this link to view the sub-categories of the major themes and the submission guidelines: <http://www.cddjournal.org/guidelines>.

Help us develop actionable knowledge that builds the resilience of the vulnerable, by promoting interdisciplinary studies and research on climate, disaster and development.
